

Compassionate Memory Care

Linda Manor Assisted Living's Life Enrichment Memory Care Program offers resident-focused care for those living with Alzheimer's and other forms of memory loss and dementia. Our compassionate care is designed to help residents experience the highest possible quality of life.

A name you trust

Berkshire Healthcare is a not-for-profit consumer-centered organization committed to fulfilling the health and residential needs of the population in the communities we serve. We are proud to be an established member of the community with award-winning centers throughout the Pioneer Valley and Massachusetts. Our network of resources and healthcare professionals allows affiliated facilities to deliver the highest quality of care.

A partnership to count on

Our residents can feel confident knowing post-acute or long-term skilled care needs can be addressed here on our campus at Linda Manor Extended Care Facility, one of only five centers in the country to earn a 2013 Gold-Excellence in Quality Award from the American Healthcare Association/National Center for Assisted Living. We not only share a campus, but we also share the same high standards of care and attention.

All-Inclusive Memory Care

Residents living with Alzheimer's and other dementias can discover new possibilities as part of our Life Enrichment neighborhood. Built around the philosophy of habilitation which focuses on the skills that remain, our program creates an environment where caregivers live inside each resident's world. We provide as much assistance as our residents need for one all-inclusive monthly fee. The only additional costs are for telephone and cable, and guest meals. And there's no entrance fee.

A Caring Community

We focus on ability, with a simplified, encouraging environment, meaningful activities, and personal support to promote self-esteem, dignity and feelings of success. Our self-contained, secure Life Enrichment neighborhood is designed for familiarity, with artwork and color cues to build connections with the world around them.

- Choice of single or shared apartment with private bath(s)
- All-inclusive personal care, including bathing, grooming, dressing, eating, toileting, and ambulation
- Dedicated dining room, beauty salon/barbershop, activities area, library and computer room, spa, country kitchen and sunroom
- Medication management
- Full-time Wellness Nurse
- Resident Care Partners for assistance with daily routines 24 hours a day, seven days a week
- Emergency alert system
- Housekeeping and transportation
- Three nutritious meals each day, with all-day options and alternative menus
- Days planned around each resident's internal clock, with activities presented at times best for each resident.

Programs for Success

Meaningful activities help residents make connections with the world around them and maintain the abilities they still have. We find that familiar everyday activities make a great foundation, so we focus on what our residents enjoy doing and what used to be part of their regular routine.

Our dining program keeps things simple to encourage success, with our care team facilitating mealtime socialization and modeling appropriate behavior. Finger foods are options for those no longer able to use utensils, and food and beverages are available all day when formal mealtimes are not realistic. Above all, we assist each resident within his or her current capabilities, always showing the utmost dignity and respect.
